PROJECT

This project involved the construction of a 3.0 million gallon per day Extended Aeration Wastewater Treatment Facility. The project required construction of a Concrete Influent Structure, Oxidation Ditches, Final Clarifiers, Chlorine Contact Basin, RAS/WAS Pump Station, and Effluent structure. A new Operations Building and Laboratory were also constructed. In addition to the new construction, modifications were performed to the existing plant Influent Structure to divert the flow to the new Screening Structure. The existing Primary and Secondary Clarifiers were converted to Aerated Sludge Holding Tanks.

RE: Contract 36 - Wastewater
Treatment Plant Improvements
Versailles, KY

Dear Donny:

3-D Enterprises has completed the wastewater plant renovation here in Versailles, KY. We are very pleased with your timely completion and the quality of the work. You are to be commended for your cooperation and attitude throughout the project. You provided experienced personnel and the proper equipment.

Your suppliers indicate that they have been paid on time. It is always good to hear that other participants in the project are happy.

I am pleased to offer our recommendation of your firm to anyone needing construction services.

Yours truly,

Mike Heathman
Director of Public Works
City of Versailles, KY
